Beautiful moments.

Enjoy many beautiful moments with a floor that'll bring you a **step closer to nature**.

Genuine wood looks

Lose yourself in the details of our wonderfully **matt and lifelike wood decors** – they're practically indistinguishable from real parquet. Each wood type and shade was **selected and designed by our experts with the utmost care**, choosing only the most authentic looks. Our team even took it a step further and constructed several designs from exclusive high-definition scans of actual pieces of wood. How cool is that?

Natural knots and cracks

Our laminate experts have put a lot of research into matching the right structure with the distinct characteristics of each wood type. From **soft and subtle wood structures** for our pine designs to a unique, **real wood structure** for our exceptional oak designs; every single knot or crack is outlined for a highly realistic effect.

Ocean 8 V4 Walnut Brown ●●

Planks of all shapes and sizes

Choose a plank size that suits your wants and needs. Go for a wow-effect and create a **fabulous herringbone** pattern with our uniquely-sized small and narrow planks. Or open up a space using **extra-large planks** instead. And what about **standard-sized planks**? After all, classic never goes out of style. Plus, a select amount of the same colours are available in these different plank sizes, so that you can **mix and match floors** in different rooms for a unique, yet uniform look.

Colours inspired by nature

Colour is one of the most essential elements for a beautiful interior. With our floors, you'll be able to explore a **broad palette of colours** for all tastes, ranging from light to dark with all shades of beige, brown, and grey in between – all made with nature in mind. Looking to **create harmony in your home**? You'll not only find that perfect shade here, but also discover which colours match it best along the way.

Want to know **which colours work together**?
Learn more on p. 12.

Carefree moments.

Real life doesn't always go according to plan. Luckily, **your laminate floor is one less thing to worry about.**

100% water resistant

Had a clumsy moment? No worries. The surface of our laminate planks is unable to absorb any liquid, making it fully splash resistant. Combined with our **hydro+ water-repellent coating** that further protects the edges of the planks, a compact locking system, and specialised hydro+ accessories used around the perimeter of the room, you've got yourself a **100% water-resistant floor that can withstand all kinds of spills.** That's right!

Scratch resistant

Not sure how your new floor will fare with pets in the house? We can already tell you now: it'll do just fine! Our laminate floors are highly **scratch resistant** thanks to our **premium-quality materials**, so those paws and claws can do no harm.

Fade and stain-free

What about other long-term effects? We'll let you in on a secret: **our floors can withstand spills from everyday products** such as food and make-up, so you're all set in that area too. Plus, our floors are **fully UV resistant**, so they won't fade over time. So open up those curtains and let the sun shine through!

Easy to install

Planning to tackle the installation yourself? With the right tools and the instructions available (you'll find them in the packaging or on our website and YouTube channel), you're fully prepared for a **quick and easy installation.** Simply slot the planks into place with the help of our snap-in-place locking system, and you'll be ready in no time.

Easy to maintain

All those splashes and spills are easily wiped away to leave a sparklingly clean surface. For regular maintenance, use a soft brush, vacuum cleaner, or microfibre mop along with our biodegradable **laminate cleaner.**

Ideal for underfloor heating and cooling

Keep your toes toasty on our laminate floors! They're perfectly **compatible with underfloor heating and cooling**, an energy-efficient system to keep your house at an ideal temperature. You'll find a dedicated manual with more information on our website.

Quality moments.

Spend quality time on a floor that's produced with only the **highest standards** in mind.

Made to last a lifetime

A home makeover requires a considerable investment, so make sure you get your money's worth by using **quality flooring**. And that's something you can find at BerryAlloc: our laminate is made from the best materials and rigorously tested for strength, water and splash resistance, impact damage, fading and discolouration, as well as stability and wear. So let our floors become the solid foundation to live your life to the fullest, as we wholeheartedly **guarantee** they're made to last a **lifetime** in your home.

Premium quality floors

You're looking for a floor that'll suit your lifestyle. Whether it's private and peaceful, or bold and boisterous, our laminate floors are more than ready to take on the challenge. The use of **superior materials** and a **solid locking system** creates a floor that's **made to last**, with high levels of abrasion and scratch resistance. These premium quality floors are more than prepared to help withstand life's trials and tribulations.

Ocean 8 XL Bloom Silver Grey ●

Ocean 8 V4 Crush Brown Natural ●●

Floors made to relax.

Made in Belgium

Our laminate floors hold the 'made in Belgium' label – something we're very proud of. The **entire creation process** from concept and design to manufacturing, testing, and packaging takes place in our plant in Menen, Belgium, under the careful eye of our dedicated flooring experts.

made in  Belgium

Responsible floors

Our floors are not only made with your comfort in mind, but also with great respect to the environment. At BerryAlloc, we strive to use as little waste as possible. Our laminate floors are manufactured in Belgium to reduce the carbon footprint. Our laminate is **PEFC-certified PEFC/07-31-229** (Programme for the Endorsement of Forest Certification), supporting the promotion of Sustainable Forest Management. And with an extremely **low VOC** (Volatile Organic Compound) **emission**, our floors are safe and healthy to install in your home.

Ocean 8 V4 Bloom Light Brown ●

Harmonise your floor with your interior!

You've chosen your new floor — that's great! Now it's time to harmonise it with the rest of your interior.

While the colour of your floor seems fairly obvious at first sight, it has a whole layer of subtle undertones. This underlying shade is called **the colour character** of your floor. **Harmony Lab** will help you to match this with the colour scheme of your interior.

How it works

The colour character of our floors are categorised in 6 colour groups:

- yellow
- orange
- red
- purple
- blue
- green

Once you know the colour character, the **chromatic colour wheel** will guide you in your decisions.

Using **harmonious colours** means using colours on the colour wheel that are either the same colour or the neighbouring colour of your floor's colour character. For example: if your floor has a blue character, this means using variations of blue, green, and purple.

Using **contrasting colours** means using colours that are directly opposite to your floor's colour character on the chromatic colour wheel. For example: if your floor has a yellow character, offset it with purple elements in your interior.

Harmonious colours

Contrasting colours

TIP

The colour character works in both ways: if you've already decided on a floor, you can use it to determine the colour of your walls. Already got a specific colour scheme in mind? Choose your floor based on that.

Are you having difficulty imagining your new laminate floor in your own home? **Floorfit** has got you covered. This **digital tool** simulates your top picks in a room of your choice. Take a moment to try out your favourite choices and figure out what suits your style best!

Turn imagination into reality.

Find out how it works:

Snap

Take a photo of your room and **upload** it to **Floorfit**. Or choose from a range of standard rooms in the tool.

Select

Choose the **colour** you want to visualise through the built-in filters. Don't forget to select a laying direction and pattern.

Floorfit

Have you found your dream floor? **Share** your final look with family and friends, or get in touch with your **local BerryAlloc dealer** for the next step.

What are you waiting for?
Floorfit it out!

Choose colours that make you happy.

Choose your favourite colour.

Choosing your new floor doesn't always have to be practical. It has to be pretty too! **Colour is one of the most important decisions** when buying a floor. But how to get to that perfect shade?

Find inspiration in a **broad range of natural colours** and discover which shades and styles blend together best to create the interior you've always dreamt of.

MIX & MATCH

- Want the **same floor colour throughout your home**? We've got a select amount of decors available for **different plank sizes and attributes**, so you can **mix and match styles and finishes** from room to room!

*Get
inspired*

Whites.

A white floor is the **ultimate blank canvas** to build your interior on. It'll suit any aesthetic or interior style, and brings an **airy, minimalistic vibe** to the room. Want a bold print or daring colours for your walls? You'll never go overboard with your look if you've got white planks to counter-balance it.

Ocean 8 V4 Retro Chic Blue Grey ●

Chateau+ Chestnut White ●

↳ Make your white floor **more playful** with our **Retro Chic Blue Grey** decor that mimics **Portuguese tiling**.

**Lovely,
light colours.**

TIP

A **smaller room** or a room with **limited natural light** will work best with a **white or lighter floor**.

Ocean 8 V4 Charme White ●

You'll find more details on our **white floors** on p. 46.

Greys.

Looking for the **perfect neutral shade**? A grey floor is an **ideal base for a bolder interior**: it's light enough to brighten up a room and dark enough to hide dust and other imperfections. Its reserved, yet elegant character will divert the spotlight towards other decorative elements, making it the ultimate sidekick to **make the rest of your interior shine**.

Ocean 8 XL Bloom Silver Grey ●

Beautifully
balanced.

Ocean 8 V4 Jazz Light Grey ●

TIP

Furniture with a more **understated style** will stand out best in a grey interior.

Chateau+ Java Light Grey ●

A full overview of our **grey floors** is available on p. 47.

Light naturals.

Ocean 8 V4 Select Light Sand ●

Chateau+ Charme Light Natural ●

Ocean 12 V4 Gyant Light Sand ●

Classic and gorgeous.

Another alternative to a more neutral floor is a light natural shade. This **range of beige and sand hues** combines the best of both worlds if you want a lighter floor to brighten up your space, yet still retain that wonderfully natural wood look. Create a **peaceful and pure atmosphere** with these beloved, timeless options.

Ocean 8 V4 Charme Light Natural ●

TIP

Light natural floors also work well with a **minimalist aesthetic**. Choose a floor without bevels to enhance that **clean, uniform style**.

Want to see more **light natural options**? Check them out on p. 48.

A floor with natural shades remains a true **classic**. The honey and copper-infused tones are ideal for highlighting the wood grain, giving you a **look that's closest to nature**. These floors will bring a cheerful, sunny energy to your room while still creating the illusion of more space.

Naturals.

Ocean 8 V4 Java Natural ●

Ocean 8 V4 Epic Natural ●

TIP

Choose a natural floor with **extra knots and cracks** to create a **more rustic setting**.

Warm, cosy moments.

↳ In love with the colour of your new floor? Use our **matching skirtings and profiles** to complete the look: p. 71.

Ocean 12 XL Gyant XL Warm Natural ●

Discover the full range of our **natural floors** on p. 50.

Want a softer colour that's slightly darker in shade? The **soothing, earthy tones** of these light brown floors absorb more light, making a colder space instantly seem warmer and cosier. Turn your room into a **comfortable little cocoon** with these **muted hues** and enjoy a more informal, homey style that works so well with these colours.

Light browns.

Ocean 8 V4
Crush Brown Natural ●●

Chateau+ Bloom Light Brown ●

Ocean 8 XL Select Light Brown ●●

Quietly content.

TIP

The **wood undertone** often varies in colour for light brown floors, providing **extra alternatives** for your interior preferences. **Harmony Lab** will help you find your match.

Take a look at all our **light brown floors** on p. 52.

Darks.

Ocean 8 V4 Java Brown ●●

The perfect outlet for your personal style.

Chateau+ Walnut Brown ●●

Forever **stylish and sophisticated**: it's worth considering a darker floor colour, because the final result is totally worth it. Fully release your creativity on these charming floors, because they work best combined with **bold, vibrant shades** and **contrasting furniture**. Make your room pop and leave everyone impressed!

TIP

Big, bright spaces will become a lot more **intimate and inviting** with a **darker floor**.

Explore the full range of **dark floors** on p. 53.

Choose the floor that's right for you.

Chateau+ Walnut Brown

Picked your perfect shade? That's great! The next step is determine **which plank size you prefer** and **which extra features your floor requires**, depending on the installation area. Find out what features work best for your installation.

Find the floor for your lifestyle.

1

I need a water-resistant floor.

Your best choice for a room where you're **more likely to encounter liquids and spills**, such as bathrooms or entry hallways.

Find out more about our **water-resistant technology**: p. 34

2

Looking for a herringbone floor?

Our classy and sassy 100% water-resistant **herringbone laminate** is sure to be an eye-catcher in every room.

Find out more about our **available plank sizes**: p. 36

LOOKING FOR EXTRA-LARGE PLANKS?

Sometimes longer planks just look better in a certain space! Find out which planks you can **supersize**.

Find out more about our **available plank sizes**: p. 36

3

I need a floor for my business.

You'll need a floor that's suited to more **intensive foot traffic**. Our class 33 laminate floors are great in public setting thanks to their higher abrasion class and commercial warranty.

Find out more about our **commercial solutions**: p. 38

4

Looking for extra silence?

Use the Excellence Plus underlay beneath your laminate floor, ideal for rooms where extra silence makes all the difference.

Find out more about our **underlays**: p. 56

Looking for a 100% water-resistant floor?

A laminate floor is unable to absorb any liquid on its surface, making it thoroughly **splash resistant**. But what if you're looking for something more resilient for your kitchen, bathroom, laundry room, or entry hallway?

That's where our innovative **hydro+ technology** comes into play. This water-repellent coating further protects your floor around the edges of each plank. As a result, you'll have a **100% water-resistant floor**, able to withstand all kinds of liquids.

100% water resistant

This is the ideal flooring solution for rooms where you're more likely to **encounter liquids and spills**. Our hydro+ technology will guarantee a **100% water-resistant floor**.

Want to discover our water-resistant floors? Check out our **Ocean+** (p. 42) and **Chateau+** (p. 44) collections.

DISCOVER OUR PIONEERING HYDRO+ TECHNOLOGY

Back in 2008, BerryAlloc was the first company to introduce water-resistant laminate to the market with its innovative hydro+ technology. This **unique formulation** has indisputably proven its durability, quality, and value for money after years of exposure to daily situations.

How does it work?

A **hydrophobic coating** is applied to all sides of the plank, effectively repelling water when it comes into contact with the joints. Applied during manufacturing, the Ocean+ and Chateau+ collections are completely water resistant when they leave the production line.

Curious to see it in action?
Watch the video!

Remember to use your **hydro+ accessories** when installing your floor for a fully water-resistant finish! You'll find them on p. 59.

Need a floor for a commercial space?

Are you looking for a durable floor to install in a commercial space? Offices, restaurants, hotels, healthcare, shops... These beautiful wood looks will brighten up any room. Plus, our laminate floors are made to be tough, **with high levels of abrasion and scratch resistance.**

Extra tough

All our collections belong to a level 33 usage class and a level 5 abrasion class. Their higher impact and wear resistance gives them a ten-year warranty for a commercial use, making them perfectly suitable for a business setting.

Our sustainability certifications

Our laminate floors carry a number of sustainability certifications. Discover them below.

BREEAM INTERNATIONAL

Our laminate floors contribute by earning up to 17 BREEAM credits in five different categories.

LEED

Our laminate floors contribute by earning up to 14 LEED points in three different categories.

Indoor Air Quality A+

Our Chateau+ collection holds an A level for Indoor Air Quality, and our Ocean+ laminate ranges an A+ level, producing the lowest possible VOC (volatile organic compounds) amounts and ensuring that all indoor air quality standards are met in full).

DID YOU KNOW?

➤ BerryAlloc is a pioneer in **water-resistant laminate flooring**, being the first to introduce the water-repellent technology to the market back in **2008**.

PEFC

All our wood is sourced from sustainably managed forests (PEFC Certified PEFC/07-31-229) that meet the strictest environmental, social, and economic requirements.

Environmental Product Declaration (EPD)

We have an EPD available for our laminate products in accordance with ISO 14025 and EN 15804+A2.

Fiche de Déclaration Environnementale et Sanitaire (FDES)

We have an FDES available for our laminate products in accordance to NF EN ISO 14025 and NF EN 15804+A1.

Other certifications

CE, REACH, ISO 9001 (quality management), fire resistance class Cfl-s1, phthalate-free.

Is it a match?
**You'll know
with Floorfit!**

Ocean 8 V4 Java Brown ●●

Don't forget the lovely details.

Install.

Yay! You've just picked out your new floor. **What's next?** Now's the moment to determine **which products** you need in your installation and decoration journey. These will help your floor achieve that wow-factor and provide you with optimal living comfort. Not sure about what you need? We'll help you with every step of the way.

Underlays

Start by selecting a suitable underlay.
A high-quality underlay can prevent creaking and reduces the sound of your steps in the room and the floor below. It's an essential item to keep your floor in great shape and will significantly improve your living comfort once installed.

The **best all-rounder** and required for our **herringbone laminate collection**.

Excellence Plus
10 m² – 2,5 mm

Excellence Impact+
12 m² – 3 mm

Excellence Go 60
15 m² – 2 mm

	Corrects irregularities and protects locking system	✓	✓	✓
	Impact sound The sound that gets carried to the room below	-21 dB	-19 dB	-19 dB
	Reduces walking sound The sound of your footsteps in the room	●●●●	●●●○	●●○○
	High impact resistance	●●○○	●●●●	●●●○
	Suitable for underfloor heating/cooling	●●●●	●●○○	●●●○

➤ You can find **all reference numbers** for our accessories on p. 77

All our underlays have been tested and approved for all BerryAlloc laminate collections – with the exception of our herringbone laminate collection, which should always be installed alongside Excellence Plus. They provide:

- A **flat base** to help correct small irregularities. This will support the necessary expansion behaviour while guaranteeing perfect performance.
- A combination of great **acoustic absorption** and **low thermal resistance**.
- An **integrated moisture barrier** to **protect** against rising damp.

Installation tools

Use our DuoLoc tapping block or our unique and super efficient BerryAlloc installation tool for a fast and flawless installation.

Ocean 8 V4 Epic Natural

Hydro+ kits for Ocean+ and Chateau+

To fully protect your Ocean+ and Chateau+ floor around the edges of the room, you'll need **the right accessories for a 100% water-resistant installation**. Our hydro+ kits make sure your floor is able to expand and remain water resistant at the same time.

Fillertwine

Use the Fillertwine joint sealing strip as a base for sealant. Fill in all expansion gaps with Fillertwine to make sure your floor can still shrink and expand, without exposing it to water.

10 m / Ø 8mm

Hydro+ sealant

This specially developed sealant should be used on top of the Fillertwine in expansion points at perimeters, under doorways and around pipes. The hydro+ sealant protects the edges of your floor from coming into contact with humidity.

310 ml

A QUICK AND EASY INSTALLATION

Our laminate floors are easy to install and require few special tools. There are **three different locking systems available**:

- **DuoLoc** for our standard planks
- **PentaLoc** for our XL planks
- **OmniLoc** for our herringbone planks

You'll find detailed installation instructions available in the packaging and on our website. Make sure to read the instructions beforehand and closely follow each step during installation.

Check out our **installation videos** on **YouTube!**

Ocean 8 V4 Select Light Sand ●

Finish.

Profiles

Remember to think about using the right profiles so your floor can smoothly transition from one room to another, all while respecting the necessary expansion behaviour. There are different profiles for different requirements, all available in **matching colours** to your floor or in a modern **aluminium**. Discover which ones work for you.

Matching T-Profile

To connect two floors of the same height.
2400 x 40 x 8 mm
(L x W x H)

Match your floor

TIP

Matching skirtings will make your **floor seem larger** whereas **paintable skirtings** will make your **walls seem longer**.

Match your wall

Skirtings

Time to think about that finishing touch. Our skirtings create a neat and tidy transition between wall and floor. Do you want **matching skirtings**, fully in line with your new floor? Or **white, paintable** skirtings to take you in any decoration direction? Your choice!

Matching skirting

Installation: glue or clips
2400 x 12 x 60/80 mm
(L x W x H)

White skirtings

Installation glue
2400 x 12 x 60/80 mm (standard)
2400 x 14 x 100/110 mm (English)
2400 x 26 x 110 mm (Cover skirting)
(L x W x H)

Matching quarter round

(only for a selection of decors)
Installation: glue
2400 x 14 x 14 mm
(L x W x H)

White quarter round

Installation: glue
2400 x 14 x 14 mm
(L x W x H)

WHAT ABOUT INSTALLATION?

There are **two ways to attach** your **matching skirting board** to the wall.

Glue it
Use our **BerryAlloc glue**.

Fix it
Use **clips*** and **plugs**.

(*) Only for 60 and 80 mm

Stairnose

Make your stairs blend in perfectly with your floor and interior.

Our stairnose perfectly matches the floor in colour and structure, providing the same level of wear resistance. Its strong locking system guarantees a smooth, edge-free transition between the floor and stairs. Easy to install, clean, and maintain, it is an ideal solution for stair renovations.

Before

After

Maintain.

Make those moments of joy on your new floor last longer by regularly using our specially developed **BerryAlloc laminate cleaner**. It's suitable for first-time maintenance as well as regular use and will provide extra protection for your floor. Plus, it's **biodegradable** and has a pleasant fragrance. All it requires is one capful to a bucket of water.

BerryAlloc laminate cleaner

1 litre

Chores don't have to be a bore.

Ocean 8 V4 Ragnar Light Sand ●

There are a lot of things to think about when choosing and planning to install a new floor. And maybe you've still got some questions left unanswered. We've listed the **most frequently asked** ones here.

Questions? We've got answers.

Choosing your floor.

What is a BerryAlloc laminate floor made of?

- A laminate floor consists of:
1. An **overlay** that determines the strength and resistance of your floor
 2. A **decor paper** for the design
 3. A **high-density fibreboard (HDF) core**
 4. A **counterbalance** to stabilise and protect the HDF core
 5. The **hydro+** water-repellent coating

WHY WOULD I CHOOSE A LAMINATE FLOOR?

With so many different flooring choices available, it can be a struggle to figure out which floor suits your lifestyle best. Why laminate then? This type of floor brings you many advantages. It's an **affordable** and **easy-maintenance** alternative for other hardwood flooring options – with equally **beautiful wood looks** and the added bonus of being extremely **scratch resistant**. And these good looks won't fade, since laminate floors are completely **UV resistant**. It's also 100% water resistant, giving you the opportunity to recreate a wonderfully natural theme throughout your entire home. Plus, DIYers will be happy to hear that the **installation is simple** and straightforward. A stress-free solution for a happy home!

Where can I buy a BerryAlloc floor?

You'll find an overview of certified **BerryAlloc dealers** in your local area on our **website**.

Find your BerryAlloc dealer!

In which rooms can I install a laminate floor?

As for commercial use, all our BerryAlloc laminate floors are categorized as **class 33 AC5**. They are suitable for light as well as heavy commercial use, for areas such as large offices, conference rooms, offices, shopping malls, classrooms, waiting areas, hotel lobbies,...

TIP

Need a water-resistant floor for a specific room? **Our Ocean+ and Chateau+ collections are 100% water-resistant** with the right hydro+ accessories.

Planning your installation.

TIP

Calculate at least **5% extra surface area** (for rectangular or simple spaces) and at least **10%** (for spaces with many corners, recesses, or sloping walls) when ordering your new floor to account for waste and cutting loss during installation.

At what point should I install my floor when renovating or building?

The installation of your floor should be one of the **very last steps** during your renovation or building project. Doing so will help **avoid unnecessary damage** to your floor while carrying out other tasks.

Can I install my new laminate floor on top of my old existing one?

This depends on the floor that's already present. It **cannot** be installed on top of a carpeted floor, as this is too soft and can cause damage to the locking system. It **can** be installed on top of a tiled floor, a hard vinyl floor, or a wooden floor, but **only** if this floor is completely **level and flat**. However, using an underlay will help level out minimal height differences and can help reduce noise.

Not sure what to do? It's always better to remove your old floor and create a new, flat base. The quality of your subfloor plays a very important role in the overall installation result.

Can I install laminate on top of underfloor heating/cooling?

Yes, you can! Both **waterborne** and **electrical systems** are compatible with a laminate floor. You'll find a **detailed installation manual** for underfloor heating/cooling on the support page of our website.

Scan the QR code to read the manual.

Should I install my floor and skirting boards before or after painting my walls?

We advise you to **paint your walls before installing your floor and skirtings**. But if this isn't feasible, make sure to cover your floor with a protective surface. You wouldn't want accidental paint spills on your brand new floor!

In which direction should I lay my planks?

There are a few things to consider when deciding on the direction of your planks.

1. Your floor usually looks best when it **follows the direction of natural lighting**. Place your planks so that they are vertical to the largest window or light source in your room.
2. If you're installing the same floor across multiple rooms, consider what direction looks best for both rooms to create a smooth transition.
3. If you're installing in a long, narrow room, lay your planks horizontally to make it seem wider. Got a smaller room? It'll seem longer with vertically laid planks.

Why should I install skirtings?

Skirtings help conceal the required expansion gap around the edges of your floor, hiding the base of your wall. It adds sophistication and tidiness to your final result.

Installing your floor.

WHAT STEPS SHOULD I FOLLOW WHEN INSTALLING MY NEW FLOOR?

Once you've acquired your new BerryAlloc floor, the following steps will help you achieve a successful installation:

After installation

- Install the skirtings
- Use our Laminate Cleaner to lean your new floor to remove all traces of dust and debris from the installation

Prior to installation

- Carefully read the installation instructions prior to installation
- Let your floor acclimatise to the room for at least 48 hours before starting installation
- Check if your subfloor is dry, level, and clean
- Place the right underlay (for a floating installation)

During installation

- Your floor should be installed at a room temperature of 18-25°C and a relative humidity of 40-60%
- Install your floor according to the installation instructions
- Use our hydro+ kit for a 100% water-resistant installation when placing an Ocean+ or Chateau+ laminate floor
- Install the profiles

Why does my floor first need to acclimatise to the room before installation?

As mentioned, a laminate floor **will expand or shrink** depending on room climate conditions. Temperature and humidity can differ between the storage place and installation area. If the planks are installed immediately upon arrival, they still need to adapt to the room. The expansion or shrinking that follows can cause **an uneven floor that can damage the locking system**. Avoid these issues by giving the planks **a suitable amount of time (at least 48 hours) to acclimatise to the room**. They will have performed the necessary expansion behaviour by then, with a successful installation as a result.

Ocean 12 XL Jazz XL Sand Natural

WHY DO I NEED TO USE AN UNDERLAY?

An underlay is a vital part of your installation and can **greatly improve the success of your installation**.

A suitable laminate underlay provides the following elements:

- **A steady base** by levelling out minor irregularities in the subfloor. This protects the locking system and helps prevent creaking
- **Reduces walking sound** and **sound transmission** to a lower-level room
- **Extra protection** against daily wear and tear (walking, falling objects, furniture...)
- Includes a **moisture barrier** to protect your floor from seasonal humidity changes in your subfloor

Always make sure to use an underlay that is **suitable for laminate flooring**. We strongly advise you to use a BerryAlloc underlay, as these are manufactured to best support our floors.

➤ Go to p. 56 to see all our available laminate underlays.

Why should I install laminate as a floating floor?

Laminate consists of at least 80% organic wood materials. This means it expands and shrinks depending on **room climate conditions**. A 'floating' installation is not attached to the subfloor (not glued) and allows the floor to move according to the necessary expansion behaviour. To allow this behaviour, you'll need to leave an **expansion gap of at least 8 – 10 mm** between your floor and all fixed constructions during installation. This is also the reason why you **cannot install a laminate floor underneath fixed constructions**, such as kitchen cabinets or built-in closets.

TIP

When installing your floor, **use flooring spacers** to make sure you're maintaining the correct distance for an expansion gap.

How do I install a laminate floor?

The installation method depends on the locking system and the laying pattern (e.g. herringbone). You'll find a **step-by-step manual available for all laminate locking systems** on the support page of our website. Our installation videos are also available on our YouTube channel.

Watch the installation video

TIP

Remember to **carefully read or watch all steps** before starting your installation.

Chateau+ Gyant Dark Brown ●

HOW SHOULD I INSTALL MY CHATEAU+ FLOOR: FLOATING OR GLUED?

Chateau+ can be installed as a floating floor, or can be fully glued to the subfloor, depending on the floor pattern. In both cases, the evenness of the subfloor is essential to obtain **a solid and long-lasting perfect result**. Make sure to thoroughly read the installation manual before installing your floor, which you can download on our website.

Maintaining your floor.

How do I maintain my new BerryAlloc floor?

Keep your floor looking brand new with these simple tips and tricks:

- Place a **doormat** at the entrance of your home to avoid bringing in dirt or moisture
- Add **felt pads** to your chair and table legs
- Use a **clear plastic mat** for under your office chair
- **Clean** any spilled liquids as soon as possible

You'll find our Care & Maintenance manual on our website, and more information on our BerryAlloc Laminate Cleaner on p. 66.

Download our Care & Maintenance manual [here](#).
